Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1 and 5 – 10 are rejected under 35 U.S.C. 102(a) as being anticipated by Chu et al.

3. With respect to claim 1, Chu et al. show (see cover Figure) a buffer layer and a relaxed layer (paragraph [0008]).

4. With respect to claim 5, Chu et al. show the substrate can be Ge or GaAs (paragraph [0034]).

5. With respect to claim 6, the strained layers (e.g. 14, 17) have a different composition (paragraph [0005]).

6. With respect to claim 7, layer 14 is Si.

7. With respect to claim 8, layer 14 has a thickness below the critical thickness, which is less than 50 nm (paragraph [0043]).

8. With respect to claim 9, Chu et al. show that the substrate could be SOI (paragraph [0034]).

9. With respect to claim 10, there are a number of strained layers (paragraph [0005]).

Allowable Subject Matter

10. Claims 2 – 4, 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

11. With respect to claims 2 – 4, Chu et al. do not show the Ge concentration as decreasing. With respect to claim 11, although the use of a weakened region is known in the art, Chu et al. do not show the use of such a structure and it would not be obvious to include such a structure. With respect to claim 12, Chu et al do not show the use of carbon and although the use of carbon in SiGe compounds is known in the art, it is not obvious to use such a structure in the Chu et al. device.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A. Wille whose telephone number is (571) 272-1721. The examiner can normally be reached on M-F (6:15-2:45).
